Re: Practec Ltd Reference

Practec Ltd were engaged on the 21 Queen Street redevelopment project to carry out the base build carpentry and fit out works package. The package value was \$1.2M with works spread over approximately a 9 month period.

They were commercially astute and detailed at tender stage providing clear and concise documentation; up front health and safety pre requisites were competently satisfied.

During initial stages they were helpful in design value management offering good alternative practical solutions. Site supervision under Mark Watson was extremely cooperative with work controlled efficiently and to the detailed project programme requirements. Likewise workmanship was of a high standard with good attention to detail and quick remediation of any issues. Similar attention was paid at project close out with snagging addressed in a timely and diligent manner.

I would not hesitate to engage Practec Ltd on future projects or recommend likewise to others.

Yours faithfully
The Fletcher Construction Company Limited

Stuart West
Project Manager
